## **Media release**

### **Sustainable water solution for Patatafontein residents**

Following the demand for water supply on the Patatafontein farm, the municipality is currently supplying water tankers to residents in the area as an interim measure to provide water.

The Civil Engineering Services has been hard at work for a sustainable solution, and will erect a Windmill to pump water into the elevated Jojo tanks that will then supply water to the taps. The construction of the base of the Windmill has been completed and is awaiting delivery of the procured Windmill.

As a permanent solution it is expected that the Windmill will be delivered and installed in the first week of December to alleviate pressure on water tankers.
