---

## **Media release**

### **Street resealing to improve access and mobility**

The Civil Engineering Services will be resealing various streets in Steve Tshwete as part of the road maintenance programme.

The following areas will be affected; Mhluzi, Middelburg CBD, New Town, Industrial park, Aerorand, Chromeville, Dennesig, Nasaret and Hlalamnandi. Work will include treatment and resurfacing of existing streets.

Providing quality infrastructure is one of the Municipality's basic services to improve access and mobility, especially to residential and business areas.

The workers will do everything possible to make sure this work is completed safely, with ease of traffic congestion. The Municipality apologises for the inconvenience that might arise as a result of the street resealing programme. Completion of the maintenance work is anticipated to take place before end of the 2015/2016 financial year.

**The following roads are proposed for resealing for 2015/2016:**
