Media Release:

Third Phase Construction at OR Tambo Street

The third phase of reconstruction at OR Tambo Street, from Bhimy Damane intersection to Joubert intersection is expected to be completed in early November, at capex of R5,2 million. The project comprises the installation of storm water, parking areas and walkways.

Manager Road and Stormwater, Lindiwe Silolo, reports that a road re-surfacing was also indicated, due to the uneven surface. The reconstruction paves that way for additional pedestrian walkways area and space for motorist, which will make this CBD area much more user friendly.

At the same time, similar road unevenness at the intersection of SADC and OR Tambo Streets are being repaired. Motorists are advised to park their cars at Eksteen, Joubert or Walter Sisulu Street, in the meantime.
