## **Media release**

### **Upgrading of intersection and road construction underway in Mhluzi**

The Civil Engineering Department has commenced road construction in upgrading the Dr Beyers Naude and Mandela intersection in Mhluzi. The road works include the widening of the affected intersection with sleep lanes.

The Dr Beyers Naude and Mandela intersection is one of the busiest intersections in Mhluzi. Once the upgrade is completed the intersection will have four dedicated sleepplanes to minimise traffic congestion. The intersection serves as an alternative link between Middelburg Mall and Mhluzi Mall. The recently completed Mandela and Samora Michael intersection is undergoing road markings.

### **Ongoing Project:Mhluzi Extension 6**

Road works at 16th and 181thCrescent – a contractor has been appointed to tar the last gravel crescent in Extension 6; the construction involves roads and storm water drains. The crescent will complete street tarring of the entire block in Extension 6. The road and storm water upgrades will be completed towards the end of 2015.

The Municipality urges motorists to be patient during the construction period as the congestion they experience now will be beneficial in the end.
