Media Release:

1st Phase of Boskrans wastewater treatment projects to be completed

Yesterday marked the start of the national water week, where the public is encouraged to use water sparingly as it is one of the most scarce resources. In Steve Tshwete Local Municipality plans are in place to ensure the provision of water in the future. This has been evident at Boskrans wastewater treatment plant where 20-million of litres of waste water are expected to be purified and benefit the community. This after the construction of the Boskrans waste water facility was kicked-off in October 2010. The first phase of the facility is expected to be completed between late July and early August this year. The R106-million project will put 20-million litres (mega litres) of purified water back into the Klein Olifants River.

Yours faithfully

WD Fouche
Municipal Manager
